Crawford congratulates Gareth Cottam on his recent promotion to Regional Director of Crawford Forensic Accounting Services (CFAS), Asia

We are pleased to announce the appointment of Gareth Cottam as Regional Director of CFAS & Head of Cyber, Asia.

Gareth has 10 years' experience in the insurance forensic accounting industry having joined Crawford in 2017 from a specialist loss adjusting firm. He has worked extensively on multi-million-dollar business interruption claims, particularly in the mining space. In addition, Gareth has produced expert reports in support of litigation matters. Gareth has had significant experience in large mining losses throughout Australia, particularly in iron ore and coal mining claims. Gareth's attention to detail and experience in loss quantification enable him to work closely with his colleagues and appointed service providers in the assessment and evaluation of complex losses. Gareth has spent several years in Asia and is fluent in Japanese and speaks Mandarin as well.

Commenting on his appointment, Veronica Grigg, President Asia said, "Gareth's experience is valuable to us and we are excited to work with him to drive the strategic growth and profitability of the CFAS business in Asia."

Gareth will be responsible for developing and establishing client relationships, expanding our CFAS services across the region and delivering on our mission to restore and enhance lives, businesses and communities. He will directly report to Martin Miller, Global Head of CFAS.
